

**Who we are** Gullen & Associates pllc is a law firm specializing in helping parties to personal injury claims comply with Medicare rules and regulations.

Our team includes experienced attorneys, claims professionals and registered nurses with many years of experience in working with the Centers for Medicare and Medicaid Services and resolving personal injury claims of Medicare beneficiaries.

The firm is managed by Christopher R. Gullen, an attorney specializing in personal injury claims and Medicare issues. His experience includes 30 years as an attorney handling personal injury claims on behalf of both plaintiffs and defendants, including serving as trial attorney in state and federal court bench and jury trials. Chris has been involved in the settlement of thousands of personal injury claims.

Chris has authored articles on Medicare legal issues for a number of national publications and is a frequent speaker at conferences of legal and risk management professionals.

**What we do** We specialize in helping parties to personal injury claims comply with federal Medicare rules and regulations.

Federal law requires parties to personal injury claims of Medicare beneficiaries to protect Medicare's interests. We help meet the parties' obligations to Medicare by reporting applicable claims to Medicare, determining if a Medicare conditional payment lien exists in a given case, helping resolve any Medicare lien and, when applicable, assisting in the preparation and approval of a Medicare set-aside as part of the settlement.

For many years we have helped claimants, attorneys, insurers and self-insured companies with satisfying Medicare requirements in the settlement of claims.

**What we charge** Our most popular service is the Medicare conditional payment lien resolution, which includes, for a flat fee of \$500:

- Reporting the claim to CMS as required by current regulations .
- Obtaining from CMS a conditional payment letter showing any Medicare payments made for treatment related to the underlying claim .
- Auditing the conditional payment listing for treatment for unrelated conditions, challenging any unrelated conditional payments and requesting a revised conditional payment listing.
- Obtaining from CMS a final conditional payment demand letter.
